

**PE1463/E**

Scottish Intercollegiate Guidelines Network Letter of 8 March 2013

Dear Andrew,

In response to the questions in the circulated in the letter regarding PE1463, SIGN has no guideline on thyroid and adrenal disorders and no plans to produce a guideline in the near future. In 2010 we had a proposal for referral guidelines for thyroid eye disease and in 2012 a proposal for a guideline on screening for pituitary function after a head injury, neither of which were supported by SIGN Council.

I hope that this helps,

Best Wishes,

**Roberta James** | SIGN Programme Lead
