

PE1785/E

Petitioner submission of 15 October 2020

There is few points I disagree with. I will raise the following:

- **Guardianship** - I agree with Social work should consider parents. But I also added on my previous petition Young adults who were in care/after care which was not added.

I also want to add that Social work should not be sitting in when a doctor questions your guardianship because it will feel pressure for the person to say yes.

There should be New reassessment every time when someone going renew Guardianship. Instead of social work using old documents.

Social work should not add false information to reports

- **Changing Schools** - I completely agree what was said so thank you for taking that into consideration.
- **Information Sharing** - I agree with this but I feel the Data protection should be updated under this reason. All information should not be release without proper evidence such as police reports, or other professional reports. Etc: If person was not charged by police and there no convections social work should not hold that information because it should be against law because it can cause stress to the person. State again young adults was not added to list
- **Independent Care Review's findings** - I feel they should be independence care review because under reason I feel social work services do not handle complaints very well and the ignore the person voice and right. That should be handled by Care inspectorate. Since I know they do not have any involvement which they should be part of the investigation side. Because I've had social work making fun of someone disability reported it and the defended social worker. State again young adults was not added to list
- **Contact** - Social work should not stop adults over 18 to see their family because it very wrong and should not be part of order in guardianship because at the end of the day it their family and the brought them up. Social work did not.

Social work need respect someone if the fallen in love and the should not judge person because of there past to other person.
