

PE1517/XXX

Jacqueline Day submission of 23 September 2017

I am mesh injured. I had tvto in dec 2011, partcial removal in 2012 and further removal in 2015. I suffer from constant pain and discomfort on a daily basis, and fully support the suspension of this barbaric procedure. Ban the mesh please so that others do not have to suffer what thousands of men and women are already going through.
