

Submission received from Angus Clemie: A Scottish approach to Taxation.

Local taxation

We are 2 pensioners living in a house we bought 40 years ago when we were both working.

We are now on a much lower mostly fixed income.

However the amount we pay in Council Tax is at a much greater percentage of our income than it was when we were working and is the largest monthly outgoing we have.

I would suggest the Council Tax needs to be related to householders income and not to the size of house.

Thanks

Len Clemie
